**QUICK INSTALLATION GUIDE**

**IN-SWING LEFT**

**1.** Remove 2 screws and secure the solid strike plate by screws 7.5in (190mm) away from the door frame.

**2.** Top 2 screws match the 2 holes with marking “IN SWING LEFT”.

**3.** Mounting Bracket

**4.** Armature plate

**5.** Secure the operator to mounting plate by 6 screws, spring washers and nuts.

**6.** Ensure the door setting slide switch is at the highest position for “In swing Left” setting. The operating mode slide switch should be at the lowest position for “Toggle mode” operation.

**7.** Connect the lock cable to the 2 most up left jumpers on the door opener. (DM-100 only)

**8.** Press remote to operate door opener.

**9.** Actual size

**10.** Set door travel limits

**11.** Electro Magnetic Lock installation (DM-100 only)

**12.** Secure the lock assembly on the door as indicated (DM-100 only)

**13.** Door Stopper: If door opens more than 100°, add a door stopper to limit the door opening angle.

**14.** DM-100 - Continute to install the lock.

**15.** DM-50 - Installation is completed.

**WARNING:**
- Ensure nothing is trapped between the shaft and the operator.
- When the motor stops, it will emit 2 beeps. Startup setting procedure is now completed.

**16.** Press and hold the door setting button. (red)

**17.** Connect the lock cable to the 2 most up left jumpers on the door opener. (DM-100 only)

**18.** Press remote to operate door opener.

**19.** Door should be in fully closed position.

**20.** Don’t tighten

**21.** Tighten
